PROPOSED SITE PLAN 1:200

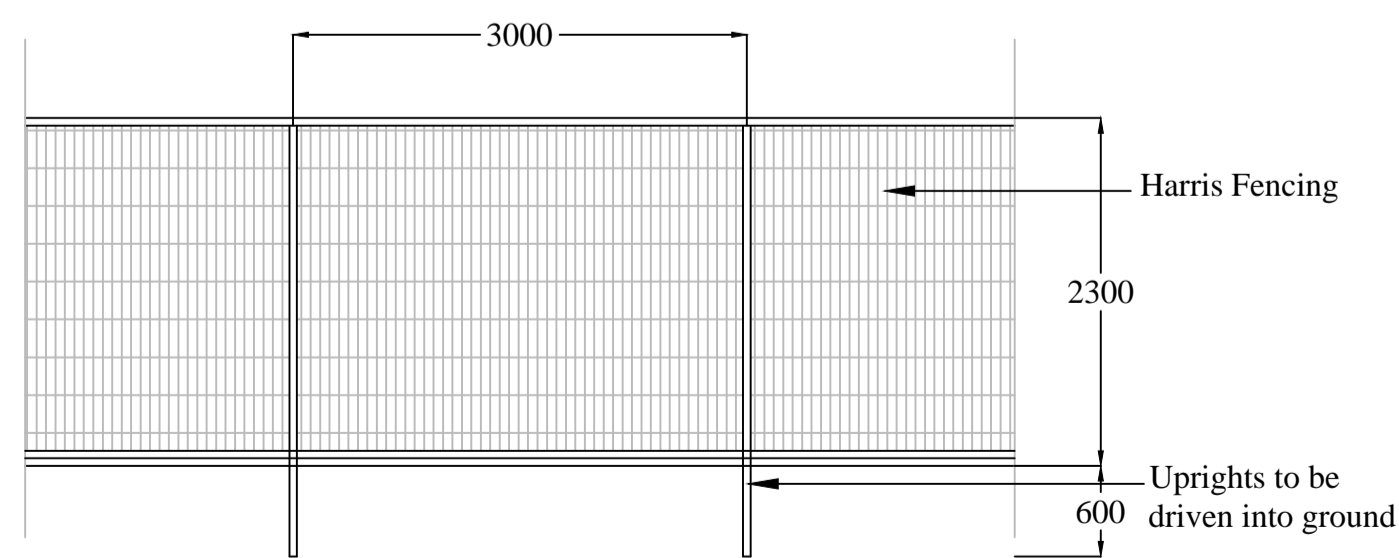

TREE PROTECTION:-

Tree protection fencing to be at least 1000mm outside the tree/tree's in question branch spread, or in accordance with Arboricultural requirements.

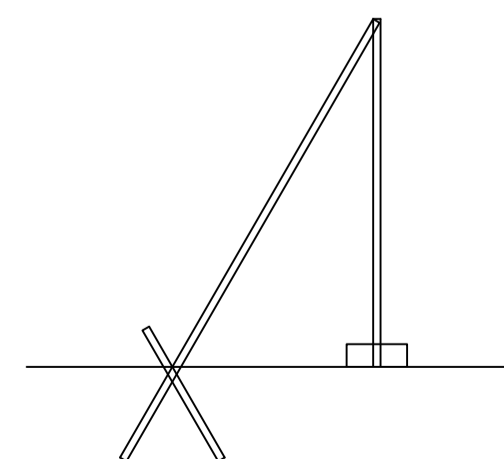

All protective fencing must be erected prior to any work commencing on-site. The fence will be erected in accordance with Planning Officer's/Local Authorities requirements/recommendation. The fence shall only be removed once all works are complete.

No chemicals or fuel shall be permitted to seep into the protected area. No works including storage, leveling, excavation shall be permitted within the protected area.

Identified trees that are not adequately protected, in the vent of damage all relevant parties may receive enforcement action and/or prosecution.

TREE PROTECTION FENCE ELEVATION 1:50
